Co-ordinate projects with geographically distributed resources	
Business Continuity and Disaster Recovery	

Sample Projects Managed: Block trading implementation, Informatica 9.5 upgrade project, CFTC FIXML project, Website Migration from NYBOT.COM to THEICE.COM.

Tools: Microsoft Project, JIRA, Confluence, ALM, RapidMiner, Harvest

Programming Languages: Java, JavaScript, R, HTML, XML

Protocol: FIXML

PROFESSIONAL EXPERIENCE

Bank of New York Mellon (BNY)

2014 – 2017

Vice President

Stream Lead for Performance and Cash streams for Informatica PowerCenter development for processing data for the world's largest hedge fund, Bridgewater Associates.

- Collaborated in developing the Informatica disaster recovery test plan reducing risk to project.
- Primary Liaison between client technology team and development team. Liaison between Informatica admin and Informatica vendor.
- Collaborated with client IT team, BNY Network and UNIX administrators to fix issue with dropped connections between Informatica server and the client's Microsoft SQL database server resulting in improved SLAs.
- Spearheaded effort to fix the corrupted Informatica repository. Collaborated with the vendor, Informatica, Informatica administrators and the Insulation Layer team to fix the corrupt repository greatly reducing risk, creating a stable production environment and saving several man hours in code deployment.
- Obtained buy-in from CIOs/CSSOs (Chief System Security officers) and then collaborated with Information security to open up firewalls between Harvest on BNY servers and local PCs on Eagle (a BNY subsidiary) VPN. This facilitated automated deployment of Informatica deployment groups reducing errors and deployment time.
- Worked with Business Analysts for developing requirements for enhancements, modifications and new development.
- Ran team/scrums meetings.
- Managed both onsite and offshore junior programmers, interviewed candidates and did code reviews. Mentored both offshore and onsite junior programmers.
- Represented IL Dev team on Production incident management review calls including CIO review calls.
- Collaborated in developing the Informatica disaster recovery test plan significantly reducing business risk to the company.

Nomura

2013 – 2014

Associate

Lead ETL developer for Informatica PowerCenter Tax US application.

- Developed, enhanced and supported changes to Informatica PowerCenter mappings for FATCA changes. Interviewed candidates for Informatica positions. Spearheaded project for Informatica upgrade from 8.6.1 to 9.1 for TAX US.

IntercontinentalExchange Inc. (ICE)

1996 – 2013

Lead Systems Analyst

Coordinated and managed projects and analyzed and developed software for the commodities exchange.

- Managed project to upgrade to Informatica version 9.5 from 8.6.1.
- Liaison with CFTC for ICE Futures U.S. data feeds.
- Managed Block Trading project. Revenue from Block trades was \$4.4 million in first year.
- Managed project to migrate the nybot.com website to theice.com. Did Gap Analysis, gathered requirements, designed, developed and implemented solution to facilitate migration. Coordinated changes required for migration of the website. Directed programmers and data base administrators for this project. This saved millions of dollars as the nybot.com was retired.
- Managed the CFTC FIXML project. Different Exchanges used to transmit their trade register data in varied formats. To standardize the transmissions the Commodity Futures Trading Commission (CFTC) formed the Trade Surveillance Data committee. Member, Trade Surveillance Data committee that did gap analysis and developed FIXML specifications for transmitting data to the CFTC. Participated in meetings of the Global Technical committee of FIX Protocol Ltd (FPL) to modify the FIXML specifications.
- Developed reports for senior management (President/COO/CTO) to monitor Electronic Trading that were used to close trading pits resulting in savings of millions of dollars.
- Analysis, design and implementation of Market Analysis Reporting System (MARS) and Market Surveillance system.
